We are very excited to host your class on your field trip! To ensure the best experience for your class, our animals, and other zoo guests, please keep the following in mind and share expectations with students:

- Below are different styles of scavenger hunts that will hopefully capture a few age ranges. In order: K-2nd, 3rd-5th, 6th-8th, and 9th+ (in development).

- When creating these scavenger hunts, we did so with our current animal collection and future plans in mind. If you choose to modify, please be aware that we try to keep our online animal collection list updated, but it is not a guarantee of animals you will see. All of our animals get to choose where they spend their time in their homes.

Expectations:

- The zoo is the animals' home. None of the scavenger hunt tasks will involve crossing over barriers, feeding animals, or require noise making. We want everyone to feel comfortable at the zoo!

- These were designed by the Education Department. They were designed to be easy to use for guests from their first visit to their fifth (and more) and to guide your zoo exploration time. While staff are more than happy to help direct groups to animal habitats, please do not ask staff for the answers. It isn't in the spirit of the scavenger hunt!

**Happy Hunting!**
Things at the Zoo

Instructions: Circle the animal clue or word once you find it in the zoo

A tall bird
A toy
A big cat
### Scavenger Hunt

Instructions: Check the circles off ✔️ after you found an animal that fits the clue. Pictures give you a hint, but may not be the answer.

Instructions: During your explorations, read the signs or observe the animals to find the answers to the questions below.

**ZOO PLAZA**
- Where do Gibbons spend most of their time?
- Where do Sarus Cranes natively live?
- Find a nocturnal animal in this area of the zoo:

**SMALL ANIMAL KINGDOM**
- Which species of tortoise is Mr. Mac?
- Which two animals have a prehensile tail?
- True/False - two-toed sloths are slow on land but are fast swimmers.

**AFRICAN PLAINS**
- Why is a giraffe's tongue blue/black in color?
- How fast can Patas Monkeys run?
- Why do African lions' ears swivel?

**SOUTH AMERICA**
- Do Zoo Boise's penguins live in cold or warm weather?
- What do the Greater Rhea use their wings for?
- Find an animal that is crepuscular (active at dawn/dusk):

**GORONGOSA**
- How many layers of fur do otters have? Why?
- Why do the hyenas and wild dogs occasionally trade places?
- What is one reason that Warthogs adapt well to changes?
